

New Traffic Signal Box Template 2018

***Please make your Traffic Signal Box art to fit this template to the best of your ability and with the acceptance that boxes are 3-dimensional and have other irregularities such as handles, vents, doors, etc. Works can not be stretched or otherwise skewed to fit due to pixelation once enlarged.**

****Artists may also choose to include a separate top panel that should be scaled to the rectangular dimensions: 44" X 28".**

***** This template works great for your 3D model!**
